CAREER OBJECTIVE:

To take a challenging role as Full-Stack Developer with a creative work environment where I could utilize my skills in all categories and use these skills in providing quality service to the company.

PROJECTS:

Project 1: JWATCH website

- ➢ It's a watch selling full-stack website.
- ➢ Here I used both user and admin interface.
- ➢ Here after login a normal user he/she can order, buy and remove his/her ordered products.
- ➢ Admin can approve pending order, add or remove a product, make an admin and manage all products
- ➢ Normal user also can review website and online payment gateway facilities.
